#BALKAN PLATFORM

Our vision is to create a Balkan-wide platform of cultural exchange and give the opportunity to the young population of this region to surpass differences and identify elements that connect them and may bring them together. Our belief is that music can unify people from different cultures and we are confident that our initiatives will strengthen the idea that young people in this region can have a common future.

Local Mad TV music channels in every country include in their daily playlist videoclips from all neighboring countries in a seamless process, since all channels operate on the same infrastructure, as soon as a local channel uploads a videoclip on the library it is instantly available to all others. Repertoire managers from all channels exchange views and priorities and as a result local artists can have a broader Balkan-level exposure without any additional effort.

In the near future, we will launch our series of Balkan Music Tours, where top artists from all countries we operate will perform live for the audience of each country.
